

QUALITY POLICY

Lliçà de Vall, 21/10/2024

At MK4, our work philosophy is based on organization, planning, and specialization. We also have the ability to face challenges in a flexible way, allowing us to adapt to new markets and meet the specific demands of each project and client.

Our company mission is to provide efficient service to our customers in the construction sector, ensuring their satisfaction through compliance with their requirements. We focus on the design and supply, and in some cases, the installation and supervision of components for the construction sector. This commitment enables us to remain one of the leading companies in our sector, specializing in: post-tensioned concrete structures, structural support devices, components for cable-stayed bridges, and technical development and assistance in bridge deck construction methods.

MK4 has experienced continuous development since its foundation, driven by a team of engineers and technical specialists dedicated to the development, supply, and installation of components for bridges and structures, bringing extensive experience in their respective fields.

We make ongoing investments in R&D&I to develop innovative products and services, while fostering solid collaborations across different countries worldwide. MK4 establishes a continuous improvement system based on the PDCA (Plan, Do, Check, Act) cycle as a management framework to ensure growth within a quality system that meets the requirements of the UNE-EN ISO 9001:2015 standard.

In addition to our commitment to quality, MK4 integrates environmental sustainability into our operational framework. In accordance with the ISO 14001:2015 standard, we are committed to minimizing the environmental impact of our activities by implementing responsible environmental management practices. These practices include:

- Promoting recycling within our facilities and construction sites.**
- Optimizing the use of natural resources to reduce waste and energy consumption.**
- Ensuring the correct handling and disposal of hazardous materials to prevent environmental pollution.**
- Collaborating with our suppliers and clients to promote environmentally friendly solutions in the design and execution of our projects.**
- Complying with all applicable legal and regulatory environmental requirements.**

At MK4, we strive to maintain a balance between our commitment to quality, innovation, and environmental protection, continuously seeking opportunities to reduce our environmental footprint while maintaining our high standards of service.

Our aim is to foster a culture of environmental awareness across all levels of the organization, ensuring that every member of the MK4 team contributes to the sustainable development of our activities.
